## SEDUM

The nomenclature of this vast race of interesting little alpine plants has been very much confused. At the present time I have seventy one named species and varieties and am adding more varieties right along. Thirty-eight of these have been verified and are marked (\*).

All these sedum are of hardy dwarf creeping varieties.

## NOTICE

All sedums are grown in 2 inch pots.

- (Acre Golden Moss.) Dense mats of evergreen foliage, flowers golden yellow .....15c
- (Acre Aureum.) Habits and flowers as above, foliage tipped yellow the early part of the season.....15c
- (Acutifolium.) Makes stems 4" high densely set with green cylindric leaves. Flower white .....15c
1. (Album Athoum.)\* Grows very rapidly forming matted masses of stems beset with innumeral minute sausage like green leaves. Flow white .....15c
2. (Album Brownii.)\* Habits and flowers same as No. 1.15c
3. (Album Carneum.)\* Leaves turn red in summer. Flowers pink .....15c
4. (Album Murale.)\* Habits very similar to No. 1 Leaves are much thinner. Flowers pink .....15c
5. (Album Purpureum.)\* Stems and foliage are red through out the season. Flows Pink .....15c
6. (Album Virens.)\* This sedum is the finest of all Albums. Leaves are very short. Grows about one inch high. Very good for crevices in crazy walks.....25c
7. (Album Turgidum.)\* Very much like No. 1.....15c
- (Altissimum.) Large grey keel like leaves thickly set on stems about 6 to 8 inches long. Flower White.....25c
- (Anopetalum) is of the Altissimum group. Flowers are yellow .....15c
- (Atropurpureum.) Leaves are dark green. 5 inches High .....15c
- (Arboreum.) Leaves grey thickly set on stems. 7 to 10" High .....15c
- (Corsecum.)\* Leaves greyish green, grows very compact.15c
- (Callichrome.) A dainty little plant with bluish grey leaves but is rather frail. The leaves turn white as season turns hot .....15c
- (Dasyphyllum.)\* Has glaucous blue grey beady leaves. Flowers white—2 inches high .....15c
- (Divergrens.)\* Has dark green leaves. Rapid creeper 2 inches high. Flowers Yellow .....25c
- (Douglassi.)\* Grows very compact, leaves green tinged red. Flowers Orange Yellow. 3 inches high .....15c
- (Ewersii.)\* A very charming little plant, is quite dwarf like with trailing stems and flat grey leaves. Flowers Rosy Pink. Grows 6 to 8 inches high .....25c
- (Elegans.)\* Dwarf stems densely set with bluish green leaves. Grows 4 inches high. Flowers White.....25c
- (Gracile.)\* Very mossy evergreen dwarf sedum. Grows 2 inches high. Flowers White .....25c

- (Glaucum.) Is very dwarf. Leaves are glaucous blue grey. 2 inches high .....15c
- (Hispanicum.) Very much the same as Glaucum. 2 in. high. Flowers White .....15c
- (Kamtschaticum.)\* Attractive plant with dark green foliage. Large Orange flowers. 10 in. High .....25c
- (Kamtschaticum Varigated.)\* Has a broad irregular white band on the leaves. A real gem for the Rock Garden. 4 in. high .....25c
- (Lydium.)\* Forms dwarf mats of bright green. 2 in. high. Flowers Pink .....25c
- (Loconicum.) Has dark green thick globular leaves. 4 in. high .....25c
- (Middendorffianum.)\* An interesting sedum. Stems are thickly set with narrow leaves resembling an evergreen. Flowers in golden clusters 6 to 8 in. high.....25c
- (Maximowiczii.) Stands close to S. Spurium. 8 in. high. Flowers Yellow .....15c
- (Neglectum.) Another form of S. Spurium.....15c
- (Oregonum.) Habits are much like S. Digergens but leaves are much larger .....25c
- (Obtusatum.) Neat little clumps of emerald green leaves. Flowers Red .....25c
- (Pulchellium.)\* A beauty with foliage of succulint green. Flowers Pink .....25c
- (Pruinatum.) A glorified (Rupestra) with glaucous blue grey leaves .....15c
- (Pruinosium.) Very like (S. Elegans) .....15c
- (Reflexum.)\* Has dark green leaves turned back on the stem. Flowers Yellow .....15c
- (Reflexum Cristatum.)\* Most peculiar of all sedum. It forms great cockscomb leaves but never flowers unless normal shoots develop .....25c
- (Replesina.) Very much like S. Tenuifolium .....15c
- (Rupestra.) Has short dark green leaves. Flowers Yellow .....15c
- (Sarmentosum.)\* It is by far the most rapid grower of all sedum. Has light green leaves. Flowers Yellow....15c
- (Seibolii.)\* Has heart shaped thick blue grey leaves. Flowers Rosey Pink .....25c
- (Sexangular.)\* A small evergreen forming dense green mats. Flowers Yellow .....15c
- (Stenopetalum.)\* Has tufts densely set with greyish leaves. Flowers White .....15c
- (Subulatum.) Has slender stems thickly set with dark green leaves .....25c
- (Spurium Splendens.)\* Has small kite shaped leaves set in rosettes which grow in great masses. Flowers Red..15c
- (Spurium Cuphrium.) Similar to Spurium S. Flowers Pink .....15c
- (Spurium Oppostifolium.)\* Flowers White. Also known as Spurium Alba .....15c
- (Spurium Stoloniferum.)\* Flowers light pink .....15c
- (Tenifolium.) Has thick waxy green leaves. Grows very erect. Flowers Yellow .....15c
- (Ternatum.)\* Has flat wedge shaped light green leaves. Grows freely in shady places. Flowers White.....15c

- (Turkestanicum.) Has dark green leaves very much like S. Altissimum .....25c
- (Virens.)\* Grows in dense clusters. Leaves are dark green .....15c
- There are twelve unidentified sedum in my collection. Some of these are very unique.....Each 25c

## RARE SEDUM

We have a very limited stock of the Rare Variations of Sedum at 35c each.

Amplexicaule—This tiny plant grows about ½ in. high and withers during the hot summer months but is green the rest of the year.

Anacampseros—Has long round stems, quite naked with handsome rosettes at the tip.

Brevifolium—Very minutely dwarf with green and purple sausage like leaves packed tightly on stems about one inch long.

Hirsutum—A small tufted evergreen with small hairy leaves turning red in summer heat.

Micranthum-Chloroticum—A very unique sedum that resembles S. Album but leaves are yellow throughout the year. Flowers are greenish White. (This sedum was listed in our old list as unnamed No. 4.

Nicaeense—Resembles S. Dasyphyllum in color and growth, but is covered with tiny hairs that look like mildew. (Listed in old list is unnamed No. 3.

Nevii—A small tufted grey green leaves grows best in shade. Flowers White.

Pittoni—A tiny creeper about ½ inch high. Leaves are bright green.

Populifolium—Grows erect on slender woody stems. Leaves are shiny green and very irregularly toothed. Flowers pale pink.

Reflexum Semperflorens—Very much like S. Reflexum but is ¼ inch high.

Spathulifolium—Resembles S. Ewersii in color and growth but leaves form small rosettes on purple stems.

## TENDER SEDUM

These are not at all hardy and should be taken in before the cold weather sets in. They make excellent house plants.
